Silver Spring, MD 20904

Subject: KT Chlorinating Tablets
EPA Registration Number: 7616-76
Letter Date: November 2, 2012
EPA Receipt Date: November 5, 2012

Dear Ms. Griffin:

This acknowledges receipt of the following notification, submitted in accordance with the provisions of PR Notice 98-10 under the Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA) section 3(c) 9.

Proposed amendments:

- Addition of alternate brand names (HDX 1" Chlorinating Tablets, HDX 3" Chlorinating Tablets, HDX Floating Chlorinator), additional label claims, and an additional marketing graphic.
- Clarification of reader's notes in kit language and storage & disposal language
- Consolidation of approved language from 9/26/12 notification and 10/3/12 label amendment

General comments:

Based on a review of the material submitted, the notification as referenced above is **acceptable**. A copy of the notification has been added to the product's file. Should you have any questions or comments concerning this letter, please contact Eliza Blair via email at blair.eliza@epa.gov or by telephone at (703) 308-7279.

Sincerely,

A handwritten signature in black ink, appearing to read "Monisha Harris".

Monisha Harris
Product Manager (32)
Regulatory Management Branch II
Antimicrobials Division (7510P)

Notification per PR Notice 98-10 to make minor changes to the label and add Alternate Brand Names.

This notification is consistent with the provisions of PR Notice 98-10 and EPA regulations at 40 CFR 152.46, and no other changes have been made to the labeling or the confidential statement of formula of this product. I understand that it is a violation of 18 U.S.C. Sec. 1001 to willfully make any false statement to EPA. I further understand that if this notification is not consistent with the terms of PR Notice 98-10 and 40 CFR 152.46, this product may be in violation of FIFRA and I may be subject to enforcement action and penalties under sections 12 and 14 of FIFRA.

RE: Notification per PR Notice 98-10 to make minor label changes and add ABN's
Product: KT Chlorinating Tablets
EPA Reg. No.: 7616-76
Company: KIK Pool Additives Inc.

Dear Ms. Harris:

On behalf of KIK Pool Additives Inc., I am submitting a notification per PR Notice 98-10 for the product label KT Chlorinating Tablets, EPA Reg. No. 7616-76.

We are making the following changes:

- Adding the following Alternate brand names:
 HDX 1" Chlorinating Tablets
 HDX 3" Chlorinating Tablets
 HDX Floating Chlorinator
- Adding minor label claims (page 3 and 4) and one minor graphic (page 7, highlighted)
- Adding clarifying reader's notes
- Kit language minor change (page 8): Substituted clarifying reader's notes to allow flexibility to use already-approved language from other parts of the label on the front panel of the kit label. (There is no change to the requirement that the EPA registered product labels will be fully visible on the outside of the kit box.)
- Consolidated the EPA approved notification of 9/26/12 with the EPA amendment of 10/3/12 (Unfortunately, the amendment label of 10/03/12 did not include the new information from the notification label of 09/26/12. As this language already has been approved, we have not highlighted the September notification changes).

Note that the Storage and Disposal (S&D) is exactly as approved, except that previously we only used a reader's note to specify the portion of S&D language that would be used for the floating chlorinator, and this time we have repeated all the language to make it easier for States and others to find.

KT Chlorinating Tablets

[Adding the following new Alternate Brand Names:]

- HDX 1" Chlorinating Tablets
- HDX 3" Chlorinating Tablets
- HDX Floating Chlorinator

[Approved Alternate Brand Names:]

- Aqua Guard 1" Chlorinating Tablets
- Aqua Guard 3" Chlorinating Tablets
- Aqua Guard Black Algae Treatment
- Aqua Guard Chlorinating Sticks
- Kem-Tek All-in-One 3" Multi Function Chlorinating Tablets
- Kem-Tek Black Algaecide Treatment
- Pro Side 1" Chlorinating Tablets
- Pro Side 3" Chlorinating Tablets

- Kem-Tek Swimming Pool 1" Chlorinating Tablets
- Kem-Tek Swimming Pool 3" Chlorinating Tablets
- Kem-Tek Swimming Pool Chlorinating Sticks
- Kem-Tek Swimming Pool Floating Chlorinator
- Kem-Tek Pool & Spa Care Black Algae Treatment
- Kem-Tek Pool & Spa Care 1" Chlorinating Tablets
- Kem-Tek Pool & Spa Care 3" Chlorinating Tablets
- Kem-Tek Pool & Spa Care Floating Chlorinator

FIRST AID: Call a poison control center [(1-800-222-1222)] or doctor for treatment advice. Have the product container or label with you when calling poison control center or doctor, or going for treatment. **If in Eyes:** Hold eye open and rinse slowly and gently with water for 15-20 minutes. Remove contact lenses, if present, after the first 5 minutes, then continue rinsing eye. **If on Skin or Clothing:** Take off contaminated clothing. Rinse skin immediately with plenty of water for 15-20 minutes. **If inhaled:** Move person to fresh air. If person is not breathing, call 911 or an ambulance, then give artificial respiration preferably mouth-to-mouth, if possible. **If swallowed:** Have person sip a glass of water if able to swallow. DO NOT induce vomiting unless told to do so by poison control center or doctor. Do not give anything by mouth to an unconscious person. Note to Physician: Probable mucosal damage may contraindicate the use of gastric lavage.

PRECAUTIONARY STATEMENTS

Hazards to Humans and Domestic Animals

DANGER. CORROSIVE: Causes irreversible eye damage and skin burns. May be fatal if absorbed through skin. May be fatal if inhaled. Do not breathe dust or spray mist. Irritating to nose and throat. Harmful if swallowed. Do not get in eyes, on skin, or on clothing. Wear goggles or face shield, protective clothing and rubber gloves when handling this product. Wash thoroughly with soap and water after handling and before eating, drinking, chewing gum, using tobacco or using the toilet. Remove contaminated clothing and wash clothing before reuse.

[For containers smaller than 50 pounds use the following:]

ENVIRONMENTAL HAZARDS

This product is toxic to fish and aquatic organisms.

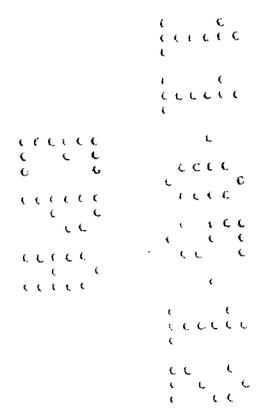

[In accordance with PR notice 95-1, use the following complete Environmental Hazards statement for containers 50 pounds and larger]

ENVIRONMENTAL HAZARDS

This product is toxic to fish and aquatic organisms. Do not discharge effluent containing this product into lakes, streams, ponds, estuaries, oceans or public waters unless in accordance with the requirements of a National Pollutant Discharge Elimination System (NPDES) permit and the permitting authority has been notified in writing prior to discharge. Do not discharge effluent containing this product to sewer systems without previously notifying the local sewage treatment plant authority. For guidance contact your State Water Board or Regional Office of the EPA.

Physical or Chemical Hazard

STRONG OXIDIZING AGENT. WILL BURN WITH THE EVOLUTION OF CHLORINE OR EQUALLY TOXIC GASES. CONTACT WITH WATER SLOWLY LIBERATES IRRITATING AND TOXIC HAZARDOUS CHLORINE CONTAINING GASES. DECOMPOSES AT 460° F TO 480° F WITH LIBERATION OF HARMFUL GASES. IN CASE OF FIRE, if possible isolate container in open air or well ventilated area. Flood with large volume of water. IN CASE OF CONTAMINATION OR DECOMPOSITION, do not reseal container.

DIRECTIONS FOR USE:

It is a violation of federal law to use this product in a manner inconsistent with its labeling.

[Use one or more of the following sets of directions]

KT CHLORINATING TABLETS are slow dissolving, concentrated tablets for use in erosion type feeders.

1. Remove everything from feeder and rinse thoroughly with fresh water. Never mix KT CHLORINATING TABLETS with any other sticks, tablets or any other chemicals.
2. Fill the feeder with tablets.
3. Adjust the feed rate so as to maintain a chlorine residual of 1.0–1.5 ppm.
4. Check the pH of the pool water daily, adding [Sodium Bisulfate (dry pool acid) or Sodium Carbonate (soda ash) and/or KEM TEK™ pH MINUS or pH PLUS] or equivalent products as necessary to maintain pH in 7.2–7.6 range.
5. If the pool is not stabilized with [Cyanuric Acid and/or KEM TEK™ STABILIZER CONDITIONER] or equivalent, add stabilizer to a concentration of 30 ppm. Consult the label on [Cyanuric Acid and/or KEM TEK™ STABILIZER CONDITIONER] or equivalent product for exact instructions.

9/14

POOL STARTUP AND HEAVY BATHER LOAD: At the start of the swimming season, in filled pools, upon filling a pool, and after heavy swimmer load, super chlorination (shocking) is necessary. Super chlorination is the addition of two or three times the normal amount of chlorine to oxidize and remove unwanted organic and inorganic material. The end result is the establishment of a chlorine residual of 1.0 – 1.5 ppm. For super chlorination, use a liquid or granular agent, such as Sodium Hypochlorite, Calcium Hypochlorite or Sodium Dichloro-s-triazinetriene, which will dispense chlorine rapidly. Consult the label on Sodium Hypochlorite, Calcium Hypochlorite or Sodium Dichloro-s-triazinetriene for super chlorination instructions. Do not use the pool during super chlorination until the chlorine residual is less than 3 ppm.

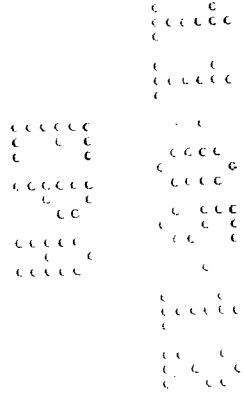

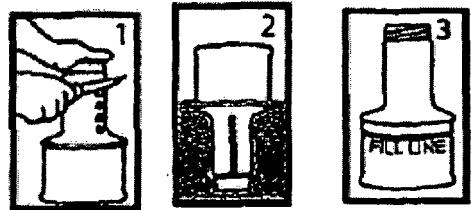

[Required on all labels] Mix only with water. Use clean dry utensils. Do not add this product to any dispensing device containing remnants of any other product. Such use may cause a violent reaction leading to fire or explosion. Contamination with moisture, organic matter or any other chemicals may start a chemical reaction with generation of heat, liberation of hazardous gases and possible generation of fire and explosion.

[The following are to be used with different alternate brand names and are different forms of the same product:]

USE OF THE FLOATING CHLORINATOR

Do not use in spas, hot tubs or in water temperatures above 90° F.

1. To use this container, cut off the two large knobs nearest the cap (at opposite sides). Locate and remove the small knob which corresponds to the pool capacity in gallons (Fig. 1). Holding the FLOATING CHLORINATOR neck down, shake lightly to level contents. FLOATING CHLORINATOR CONTAINS 1" CHLORINATING TABLET (slow dissolving, stabilized and highly concentrated).
2. Place FLOATING CHLORINATOR into the pool water neck down (Fig. 2). Monitor chlorine feed setting using a reliable test kit; chlorine residual should read from 1 - 1.5 ppm. To increase chlorine residual, cut off the small knob for the next higher pool capacity. As part of routine maintenance, super chlorinate regularly using an unstabilized chlorine product *[[such as] CHLORINATING LIQUID or SHOCK™]*. Adjust pH as needed with pH PLUS™ or pH MINUS™ keeping it between a 7.2 - 7.6 reading. To minimize chlorine consumption, add CHLORINE STABILIZER as needed to give a concentration of 30 ppm. Follow the instructions provided on these labels.
3. FLOATING CHLORINATOR tilts when empty. Drain all water and remove safety cap to refill. Use KT CHLORINATING TABLETS only. Never mix with any other chemicals or tablets. DO NOT OVERFILL (Fig. 3). When FLOATING CHLORINATOR shows signs of brittleness or cracking, it should be replaced.

USE OF LARGE SKIMMER TABLETS

- One dose lasts up to 2 weeks
- Individually wrapped for easy handling

This product is designed to dissolve slowly providing a steady source of available chlorine in vinyl lined pools without an automatic timer on the pool pump. Pump should run a minimum of 8 hours per day, otherwise vinyl liner damage may occur. If chlorine residual goes above 3 ppm, reduce skimmer flow rate or daily pump operation time. Shock treat weekly or every other week with appropriate shock treatment. Follow label directions.

GRANULAR ALGAECIDE (BLACK ALGAE TREATMENT)

GRANULAR ALGAECIDE is a potent algaecide, which is effective against all algae when used as directed. It is especially effective against so-called "black" algae which appears as spots on the walls and bottom of pools.

1. Check pH of water. Adjust pH (if necessary) to a residual of 7.2 – 7.6 using a reliable test kit and soda ash or dry pool acid.
2. Similarly, check available chlorine and adjust (if necessary) to a residual of 1.0 – 1.5 ppm using a dry or liquid chlorinating product.
3. Place one tablespoon of GRANULAR ALGAECIDE directly on the black spots (if on the pool bottom). If spots are on the pool walls, place a tablespoon of GRANULAR ALGAECIDE on a 6" square cloth, tie and hang from the edge of the pool by the spot.
4. Wait 24 to 36 hours. Brush spots off with a wire algae brush and repeat steps 1 through 3 until algae free.

NOTE: Do not allow direct contact of this product on the following pool surfaces: vinyl, metallic, fiberglass, painted or colored plaster. Product will bleach color out.

[Reader's Note: Throughout this label, product names for other similar products (i.e., pH adjusters, stabilizers, chlorinators etc.) may be substituted as appropriate.]

STORAGE AND DISPOSAL

Do not contaminate water, food, or feed by storage and disposal.

STORAGE: Keep product in tightly closed container when not in use. Store in a cool, dry, well-ventilated area away from heat or open flame or in case of decomposition, isolate container in open area if possible, and flood with large amounts of water. **CONTAINER HANDLING:** Nonrefillable container. Do not reuse or refill this container. **IF EMPTY:** Place in trash [collection] or offer for recycling if available. **IF PARTLY FILLED:** Call your local solid waste agency for disposal instructions. Never place unused product down any indoor or outdoor drain.

[If floating chlorinator directions are on the label, use the following:]

STORAGE AND DISPOSAL

Do not contaminate water, food, or feed by storage and disposal.

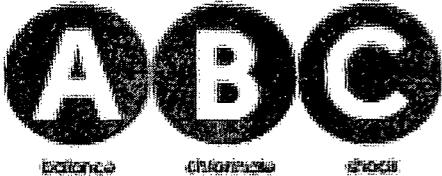

STORAGE: Keep product in tightly closed container when not in use. Store in a cool, dry, well-ventilated area away from heat or open flame or in case of decomposition, isolate container in open area if possible, and flood with large amounts of water. **CONTAINER HANDLING:** **FLOATING CHLORINATOR DISPOSAL:** Triple rinse cracked or broken containers and offer for recycling. If recycling is not available, discard in trash.

[Optional: Kit Label]

[The following may placed on front, side, or back panel of box and/or as an insert. Text is optional. Other text from EPA approved labeling (for products in the kit) may be substituted or used.]

[The following will be part of the Above Ground Pool [Start Up] [Maintenance] Kit's instructions]

STEPS FOR USING ABOVE GROUND POOL [START UP] [MAINTENANCE] KIT:

Pool Care: The Importance of Testing

Without proper testing a pool can quickly become cloudy, develop undesirable odors and even become unsafe to use. Testing is used to guide you in the treating of water. With proper testing this Start-Up Kit provides all the essentials to properly maintain your pool. Additional Kem Tek Products [or insert other brand name] are available to correct problems should they occur.

Chlorine: Chlorine breaks down due to many factors - swimmers, water temperature, and sunlight. In order to prevent growths, a chlorine level of 1-3 ppm must be maintained daily. Super chlorinate (shock) using the [insert ABN for EPA Reg. No. 7616-70] to start-up and establish a chlorine level as well at least once per week to remove any chlorine resistant problems. Use the test strips provided or any other reliable test kit to properly chlorinate the pool water. Use [insert ABN for EPA Reg. No. 7616-70] [and/or insert ABN for EPA Reg. No. 7616-76 or other appropriate registered product] to maintain daily chlorination (see below).

pH: pH is always present in water. Keep between 7.2 and 7.6 to make water comfortable for use. In addition, the other products used in pool care operate best in this range. pH control is a process of increasing when it gets below 7.2 with Kem Tek pH Plus* or lowering it when it gets above 7.6 with Kem Tek pH Minus* to keep it in the ideal range. If pool pH is low, stop use of pool until pH is adjusted above 7.0.

(Start-Up):

Test pH and adjust to 7.2 – 7.6 if necessary. Then super chlorinate (shock) by following the dosage on the chart for your pool size. Once chlorine level is established and between 1-3 ppm, proceed with Daily Chlorination. Do not use the pool until the chlorine residual has dropped to 3 ppm.

[When Kit Contains EPA Reg. No. 7616-70]

Chlorination (daily):

For [insert ABN for EPA Reg. No. 7616-70] follow the dosage on the chart for your pool size. Treat pool every evening. For pools with above average use, treat mid-day and in the evening by adding the maintenance dose.

[and/or]

[When Kit Contains EPA Reg. No. 7616-76]

Chlorination (daily):

Add enough [insert ABN for EPA Reg. No. 7616-76] to fill dispenser half way. DO NOT FILL DISPENSER COMPLETELY. Adjust dispenser to a mid-setting. Place dispenser in pool water with chemical release openings facing down. Hold dispenser until it floats properly and upright. Test chlorine level periodically. Chlorine level must be maintained between 1-3 ppm at all times. Adjust floater setting to increase or decrease chlorine output. Do not use the pool until the chlorine residual has dropped to 3 ppm.

Weekly:

Super chlorinate in the evening and when heavy use or rain occurs. If water becomes cloudy or algae starts to grow, triple this dose to correct the problem. Run pump 4 to 8 hours minimum after addition of [insert ABN for EPA Reg. No. 7616-70].

pH Adjustment:

Keep between 7.2 and 7.6. When the pH goes above 7.6 add Kem Tek pH Minus* and if it is below 7.2 add Kem Tek pH Plus*. Use chart for dosage. Run pump and check after 2-4 hours. The dose on the chart is only an estimate. Repeat as needed until the pH is corrected. Use a half dose when nearing the correct pH level.

Algaecide:

The chlorine used to prevent growths in pool water is rapidly consumed by weather conditions and pool use. The addition of Algaecide* helps prevent algae from getting started during periods when the chlorine is below 1 ppm. Add [an] Algaecide* [such as Kem Tek Pool & Spa Care Algaecide & Clarifier*] at least once a month for prevention. Treat weekly for busy pools or hot summer weather. Whenever an algae growth occurs follow the instructions for super chlorination then add algaecide 24 hours after chlorination and chlorinate pool to 3 ppm if needed.

[In the text "this product" or alternate brand name may be substituted for KT Chlorinating Tablets name]

[[Information in brackets] is optional or instructional; italics in brackets indicate instructions not part of labeling.]

Maintaining Your Pool:

Your pool can be kept clean and trouble free by following these instructions. In order for the chemical treatments to be effective the filter system must also be kept clean and in good working order. Hot weather and heavy swimmer load create the need for more chemical treatment and also require that the pump is run more often or for longer periods of time. Run the pump every night after adding chlorine to properly treat the water. In hot weather and with heavy use, due to the size of the pump/filter systems on small above ground pools, circulate 24hrs. per day. Also after every major storm or above normal use shocking the pool must be done to prevent problems.

[Reader's Note: Throughout this label, product names for other similar products (i.e., pH adjusters, stabilizers, chlorinators etc.) may be substituted as appropriate.]
